

GET TO KNOW VLCM

VLCM's purpose is to take care of our customers, employees, and vendors, so we can all enjoy life at work and at home. We do this by providing the right IT solutions, at the right time, and at the right value. We've been in business for 32 years and employ more than 100 people across 4 different states (Utah, Colorado, New Mexico, and Idaho). VLCM is an established IT solution provider with extensive IT certifications and deep technical expertise across a broad portfolio of products and solutions. We are passionate about helping our customers solve real business problems.

Key Differentiators and Customer Testimonials

Engineer Expertise and Customer Support- VLCM employs more than 25 certified IT engineers and professionals to help you plan, design, implement, service, and support your IT environment.

Best-of-Breed Solutions- VLCM evaluates hundreds of technology vendors and solutions, then carefully selects and represents only the best.

Customer Education- We consistently host seminars, lunch and learns, tradeshow, executive retreats and workshops to educate and enable our customers to stay ahead of the rapidly changing IT world.

Sales Team- VLCM's honest, experienced, and professional sales team always does the right thing for the customer.

VLCM Customer Testimonials

"I have been a VLCM customer almost as long as they have been in business. Over the years our relationship has developed into a partnership. They are genuinely interested in helping us be successful. They provide education on new technology and have a knowledgeable sales team that is familiar with a wide range of products to recommend the right solutions for our business needs. They have a strong technical staff who are available to help with pre-sales questions, installation, and troubleshooting. If you are looking for a technology partner you can trust, check out VLCM."

Keith Bergman, Orbital ATK

"We have used VLCM for a few years now and we are very impressed. They have ample connections to the services we need and offer great solutions for our business environment. Whenever we have a problem we can usually contact our rep and get a response within a few minutes. Even if our rep is unavailable we can call in and anyone has the technical knowledge to help us with any problems."

Marc Hunter, DSI Underground

"Our firm has been working with VLCM since 2008 and have had a great experience with them. One time an installation of major hardware was causing us grief with an intermittent and difficult to track down problem. When they couldn't solve it remotely, they put 2-3 techs on site at their own expense for over 2 weeks to try and track down and solve the problem. That's great customer service making sure we were taken care of. Thanks VLCM."

Oak Norton, Craig Swapp & Associates
