## Axiom is the leader in OEM Alternative Optics.

According to Gartner, "Nearly all OEMs markup transceivers much more than other hardware products,<sup>1</sup>" with "enterprises **overpaying for transceivers by 50% or more** on a regular basis.<sup>1</sup>"

Ready to make a change? Axiom can help uncover the cost savings in your data center.

Let Axiom introduce you to THE OEM Alternative™ for your transceiver needs and beyond.

### We've got you covered.

Axiom supports all major OEM brands:

### Axiom provides over 1,000 brand-equivalent transceiver options including:

- 10 G
- 25 G
- 40 G
- 100 G
- DAC | AOC
- SFP+ | SFP28
- QSFP+ | QSFP28
- Fibre Channel

### With over 20 years of industry experience, you can put your trust in Axiom.

- Savings up to 70% lower than OEM options
- Extensive selection of transceiver solutions for networking and storage interconnects
- 100% compatibility guarantee that won't void OEM warranty
- RoHS and TAA compliance
- Lifetime warranty backed by unlimited free technical support

### DON'T FORGET!

Axiom offers Third-Party Maintenance that can extend the life of your IT investments and support your EOL and EOSL needs.
