

Why You Should Consider a
CLOUD PHONE SYSTEM

WHY CLOUD COMMUNICATIONS?

Your phone system plays a critical role in your business operations and in your company's success. But with more employees working from home and on the go, increasingly global markets, and ever-changing customer demands, today's workforce requires decision makers to think beyond the traditional phone systems of days past. The modern workplace requires a complete communications solution that not only lets employees interact with ease, but empowers IT teams to easily manage and adapt to an evolving business environment.

This eGuide explains cloud technologies, compares traditional and cloud-based phone systems, and discusses how unified communications can elevate your communications experience. Use it to better understand cloud communications and determine if a cloud phone system is right for you.

OVERVIEW

1

CLOUD COMMUNICATIONS 101

Chances are, you're already using cloud technology in other aspects of your business. G Suite by Google Cloud®, Microsoft Office 365® and Dropbox® are just some examples of cloud-based applications.

The cloud simply refers to software and services that are hosted by the provider and run on the Internet instead of equipment housed in your building. Since the documents, emails, photos and other software that live in the cloud are available from any device with a secure Internet connection, users can access the information and services from anywhere.

CLOUD VS. ON-PREMISES

When it comes to communications, a cloud-based phone service offers unique benefits that a traditional on-premises phone system cannot. Let's take a quick look at how these two deployment models differ:

On-Premises Phone System

- You fully own and operate the solution
- You are responsible for overall maintenance, upgrades, reliability and security
- Typically acquired as an upfront purchase, and accounted for as a capital expense

Cloud Phone Service

- Applications are hosted remotely by the cloud provider or a hosting partner
- Cloud provider manages the service, relieving in-house IT of most or all network-related tasks
- Services are consumed as a monthly subscription expense

2

ON-PREMISES CONSIDERATIONS

With an on-premises phone system, IT maintains control of your solution. As a capital expenditure (CapEx), there are minimal-to-no ongoing costs to finance the solution. However, there are several important considerations to keep in mind:

Total Cost of Operations: Plan to factor in the additional costs of system maintenance, changes/adds/deletes, upgrades and replacements.

Obsolescence: With technology constantly evolving, there is risk of the equipment quickly becoming obsolete.

Resources: If IT resources are limited, the complexity of the deployment may pose problems in implementation and user adoption.

Less Flexibility: An on-premises solution may have limited flexibility when integrating with new applications and rapidly supporting new sites or remote workers.

3

BENEFITS OF A CLOUD-BASED PHONE SYSTEM

Value: There are minimal-to-no upfront expenses as you pay monthly on a subscription basis. Plus, with many cloud providers, upgrades are automatic, and maintenance or installation fees are either low or non-existent

Maintenance: Cloud phone services require minimal-to-no onsite equipment, eliminating the need for equipment that requires valuable time from IT staff and space in your building

Accessibility: Employees have access to the same features and functionality whether they're in the main office, working from a remote location or on the road

Integrations: Easier integrations with popular back-office cloud solutions, such as CRM, ERP and other apps, turn a cloud phone system into a communications hub that enhances productivity and collaboration

Scalability: Adding locations, growing teams and seasonal fluctuations become simple to handle in a cloud environment, with new users able to be provisioned in minutes

"While the benefits still largely revolve around *cost savings*, the reasons for deploying UCaaS are to

EMPOWER EMPLOYEES & IMPACT THE BUSINESS

on a variety of fronts."

- AMY LIND,
IDC RESEARCH MANAGER

3

WHY BUSINESSES ARE MAKING THE MOVE TO CLOUD

The key difference is that cloud communications can help your business to be more agile. Cloud solutions are often more flexible, scalable, reliable, and offer greater access to innovative features designed to make your employees more productive.

5 MOST CITED REASONS

for Moving to Cloud Communications:

1 | AGILITY

2 | TOTAL COST OF OPERATIONS

3 | RESILIENCY

4 | LACK OF IT RESOURCES

5 | SCALABILITY

IS A CLOUD-BASED PHONE SYSTEM RIGHT FOR YOUR BUSINESS?

3

1 | Rapid Growth and/or the Need to Support Seasonality

The built-in flexibility of the cloud makes it a great fit for companies that need to scale.

2 | Multiple Locations

If you're moving or adding offices, cloud systems make it simple to add new users quickly.

3 | Mobile Workforce

Cloud phone services often provide seamless mobile applications, so employees can communicate anytime, anywhere, from numerous devices.

4 | Limited IT Resources

Cloud communications offer expert installation, ongoing support and automatic software upgrades.

5 | Outdated Equipment and/or Equipment Coming to End of Life

If it's time for an upgrade, there's no better time to consider moving your communications to the cloud.

6 | Dynamic Regulatory Environment

The right cloud provider will stay current with common industry requirements, ensuring compliance and conformity across multiple locations.

7 | A Need to Improve the Customer Experience

Cloud-based solutions offer greater integration opportunities that, in turn can help you meet the distinct needs of your business.

8 | Competitive Pressures

The increased agility of a cloud solution can help you increase productivity, retain and attract top talent, and more easily set your business apart in competitive markets.

4

WHAT TO LOOK FOR IN A CLOUD COMMUNICATIONS SOLUTION

Unified communications (UC) technologies go beyond basic telephony by seamlessly integrating popular communications applications, helping to streamline every day workflows and improve productivity. As you're evaluating communications solutions, take full advantage of what the cloud offers by looking for a solution that includes features such as:

Chat/Instant Messaging: Collaborate and communicate with other employees across the office, across town or across the globe.

Web Conference & Desktop Sharing: Increase the effectiveness of your online meetings by sharing important documents and visuals with a single click.

Video Conferencing: Integrated, cloud-based video conferencing provides a seamless environment for a more personal communications experience.

Mobile Applications: Apps let you take your business line wherever you go and seamlessly move from your desk to a computer softphone to a mobile device without skipping a beat.

Collaboration Tools: Eliminate email clutter with virtual workspaces, team or project based chat rooms and task management tools.

Back-Office Integrations: Solutions with a broad suite of integrations to your key back-office systems, such as your CRM or helpdesk systems, help simplify routine tasks and improve reporting capabilities.

MITEL CONNECT CLOUD: A CLOUD COMMUNICATIONS SOLUTION DESIGNED TO GIVE YOU MORE

✓ More Integrations

Mitel Connect CLOUD integrates with countless applications, so your business can do more.

✓ More Flexibility

Mitel Connect CLOUD makes it simple to add users and capabilities as your business expands.

✓ More Value

Industry analyst cite Mitel as the leader in terms of total cost of operations for unified communications.

✓ More Mobility

Convenient mobile apps and collaboration tools allow teams to stay connected and productive wherever they are.

✓ More Features

Goes beyond just a phone system to provide rich collaboration features like desktop sharing, chat, video and team workspaces.

✓ More Simplicity

Mitel Connect CLOUD provides a complete UC solution and intuitive user experience for all users, no matter their location or device.

WHY WAIT?

Isn't it time you gave your phone system a fresh look? Learn how Mitel Connect CLOUD can benefit your business. Visit mitel.com to learn more.
